

PHI Installation Guide

Nicholas F. Chilton

Windows

The *PHI* package is installed by running the `PHI.msi` installer.

MacOS

The *PHI* package is installed by copying `PHI.app` to the Applications folder.

Linux

The *PHI* package is installed by running:

```
tar -xvf PHI.tgz; chmod +x PHI.sh
```

PHI can then be run by executing `PHI.sh` (double-click and choose run in Terminal, or `./PHI.sh` in the Terminal)
